PROSPECTUS

WELCOME

Welcome to Olevels.com School, where education meets clarity, discipline, and purpose. Our programs are designed for students who are self-motivated and enthusiastic about learning.

Our program is best for enabled parents, who have control on their kids and are motivated in upbringing their children. We believe in empowering students to achieve academic excellence while preparing them for real-world opportunities through structured, focused, and intentional education.

OUR UNIQUE APPROACH

Customized Learning Framework

- Focusing on completing O-Levels and A-Levels early, Consider O/Alevels a skill.
- Designed for students who are enthusiastic and committed to disciplined learning.

Internships and Practical Skills

- Opportunities for students to engage in internships, gaining hands-on experience in tasks like video editing, graphic designing, entrepreneurship and project assistance.
- Extracurricular activities integrated

Clear Expectations

- Our admission process ensures families understand the dedication required for our programs. We aim to foster independence and enthusiasm for learning in our students.

WHAT WE DO NOT OFFER?

- We do not provide STEM or coding-specific programs.
- We do not promise religious education. Some parents believe it is the school's responsibility to provide complete Tarbiyah for students. However, students spend only 18% of their week in our physical campus, while the remaining 82% is spent at home. This makes Tarbiyah primarily the parents' role. Our school can focus on maintaining a positive environment.
- We do not commit to outcomes beyond the framework we establish for focused and disciplined study.

KINDERGARTEN & PRIMARY

Kindergarten and Primary Classes At Olevels.com School, our Primary Section (up to Grade 4, ages 9 and below) operates in Bani Gala and Karachi with a mission to foster a love for learning.

Key Features:

Flexible Schedule:

Classes run four days a week (Monday to Thursday) with no homework, making learning enjoyable.

Engaging Lessons:

Computerized, activity-based, and interactive classes keep students focused and motivated.

Reward System:

Students earn coins redeemable for fun activities, promoting motivation and enthusiasm.

Parents can also use the JM Four-Step Knowledge Framework at home to enhance learning. At Olevels.com School, we provide a supportive, pressure-free environment where children thrive academically and personally.

JM 4-STEP KNOWLEDGE FRAMEWORK

Equipped with Certified Tutors,
Artificial Intelligence
& Engaging Audio-Visuals

At OLevels.com, we use AI and certified tutors to deliver outstanding results through smart technology.

Let's get into details how we have been able to achieve this?

**1. We focus on questions, not theory—
unlike schools that spend 80% on lectures.**

Teaching complex concepts online often leads to boredom and distraction. By the time exams approach, it's too late. That's why we focus directly on past papers, This method boosts retention, maximizes brainpower, and leads straight to A's. Let us show you how.

2. Byte-sized lessons make learning easier and faster to digest.

We break down course content into bite-sized bits for easier learning. Questions are organized by chapter, topic, and sub-topic, with difficulty increasing gradually to help students absorb concepts more effectively.

3. Gamifying our courses to keep learning fun and students engaged.

To keep our teen students engaged, we've gamified learning with points, levels, and progress celebrations. Clear daily goals and real-time feedback help them stay focused and on track.

4. Track progress in real time with daily goals, guided by certified tutors.

Our AI-powered system rewards students with points and tracks real-time progress. Instructors monitor each student's performance to offer support, while parents receive regular email updates.

IGCSE/OLEVELS

The O-Levels program at O-Levels.com school works through both physical and online school programs. For the IGCSE/O Levels, students typically aged 9 to 14 are accepted. The program can take from 1.5 to 3 years to complete, depending on the child's progress and understanding.

Subjects which we offer:

 **Physics**

 **Biology**
OR
 **Computer science**

 **Chemistry**

 **English**

 **Maths**

Compulsory subjects required for international universities (5 Subjects)

 **Islamiat**

 **Urdu**

 **Pakstudies**

Compulsory subjects Required for Pakistani universities (All 8 Subjects)

ALEVELS

We follow Pearson Edexcel Alevels

Stage	Year	Exams	Number of Papers	Description
AS Level	Year 1	AS Exams	3 Papers	Foundation stage covering core concepts of the subject.
A2 Level	Year 2	A2 Exams	3 Papers	Advanced stage building upon AS content with deeper analysis.

Edexcel, however, provides flexibility by allowing students to take exams three times a year instead of just once.

Why Edexcel?

For example, in AS Physics under Cambridge, the exam is conducted once a year. In Edexcel, the Physics exam is divided into three units: Unit 1, Unit 2, and Unit 3. This means you can take Unit 1 in January, Unit 2 in May, and Unit 3 in October.

If, for example, you score low in Unit 2 but performed well in Units 1 and 3, you only need to retake Unit 2 instead of repeating the entire year, as required in Cambridge.

Similarly, A-Level Physics is divided into six units in Edexcel. This system allows students to complete their A-Levels comfortably, with less stress and better grades. In terms of degree acceptability, there is absolutely no difference.

GED

At Olevels.com, we provide multiple pathways to success, including the General Educational Development (GED) program. The GED offers a high school equivalency credential for those who haven't completed traditional high school. Covering Math, Language Arts, Science, and Social Studies, the test ensures college and career readiness. Earning a GED opens doors to higher education and better job opportunities. Our school is dedicated to supporting students in achieving their academic and career goals through this valuable program.

BTEC LEVEL 3 PROGRAM

After completing O-Levels/IGCSE, most students traditionally opt for A-Levels. However, an alternative pathway that provides equal recognition and greater practical exposure is the BTEC Level 3 Program. This qualification is equivalent to 3 A-Level subjects and allows students to gain real-world experience while studying.

Why Choose BTEC Level 3 Over A-Levels?

- Equivalent to 3 A-Level Subjects
- Internships & Job Opportunities
- Exposure to AI & Modern Technologies
- Industry-Relevant Practical Learning
- Fast-Track Career Growth
- Flexible & Engaging Learning Experience

BACHELOR'S PROGRAM

At Olevels.com, we offer a comprehensive Bachelor's Program through the Pearson BTEC Level 5 Higher National Diploma (HND) in Business. This UK-based qualification, equivalent to the first two years of a traditional bachelor's degree, is designed to build a strong foundation in core business concepts. With a curriculum focused on practical learning and real-world application, the HND equips students with the skills and experience required for both career readiness and academic progression.

ACCREDITATION

Our program is accredited by the Higher Education Commission (HEC) of Pakistan and Pearson (UK). Students who complete the two-year HND (Levels 4 & 5) can advance to a Top-Up Year at any UK-based university to earn a full bachelor's degree. Eligibility includes completion of A-Levels, Intermediate (F.A./F.Sc.), or BTEC Level 3. Students must also be committed to an 11-hour daily schedule—comprising 8 hours of internship at Olevels.com and 3 hours of study, six days a week—ensuring a blend of academic depth and professional experience.

INTERNSHIP

Internships at Olevels.com are an essential part of our Bachelor's Program and BTEC L3 Program, offering students valuable real-world experience alongside their academic journey. For those who complete their academic milestones early, internships provide hands-on exposure in areas such as video editing, content creation, and supporting course design. These opportunities not only enhance technical skills but also build confidence and workplace readiness. All students begin with a free internship as part of the program structure. As they grow and demonstrate their abilities, there is potential for paid internship opportunities, based on skill development and performance. These paid roles are aligned with current market standards, although they are not guaranteed and depend on the student's growth and contribution over time.

ADMISSIONS PROCESS

ELIGIBILITY

- ✓ Students who are self-motivated and willing to dedicate themselves to disciplined study.
- ✓ Parents willing to collaborate actively in their child's educational journey.
- ✓ Good english comprehension.
